Routes of Exposure:

Eye contact - Immediately flush the eyes with plenty of water for at least 15-20 keeping the eyelids lifted. Remove contact lenses if easy to do. Continue rinsing for at least 15 minutes. If eyes are still red and there is still nuisance, consult an ophthalmologist.

Skin contact – In case of contact with skin wash immediately with soap and plenty of water. Avoid rubbing. Take off clothes and shoes which are contaminated with the mixture. In any case of persistent irritation/pain, it's better to seek medical advice.

Inhalation - Take the person into open air. In any case it is always best to seek medical assistance. Never leave the victim unattended. Keep the victim calm, at rest and in a position comfortable for breathing. Keep body temperature and breathing controlled. In case of loss of consciousness, place patient in recovery position and immediately call a doctor.

Ingestion - Obtain immediate medical attention. Do not give anything without the doctor's advice and only if the affected person is conscious. Do not induce vomiting.

4.2. Most important symptoms and effects, both acute and delayed
